EDUCATION

Master in Applied Artificial Intelligence Tec de Monterrey GPA 98/100	Jan 2024 – Present
Specialization in Machine Learning for Supply Chains LearnQuest 4/4	Mar 2025 - Apr 2025
B.S. in Computer Science and Technology Tec de Monterrey GPA 98/100 Honorable mention for outstanding academic performance.	Aug 2019 – Jun 2023
Minor in Advanced Artificial Intelligence for Data Science Tec de Monterrey GPA 98/100	Aug 2022 – Dec 2022

EXPERIENCE

Software Engineer C3.AI Zapopan, MX	Nov 2024 – May 2025
Reduced page load times by approximately 35% on <u>Reliability</u> , C3.AI’s largest app, through bundle profiling, code splitting, and tight cross-team coordination. In <u>Process Optimization</u> , raised backend test coverage from ~60% to ~80% and release confidence by launching PSR test workflows with PMs, authoring PSR onboarding documentation, and initiating a <code>pytest</code> suite for new ML Explainability features.	
Machine Learning Associate Tata Consultancy Services Zapopan, MX	Nov 2023 – Nov 2024
Contributed to crafting advanced classification models. Actively engaged in the implementation of cutting-edge prediction services on Google Cloud Platform (GCP) and Azure Machine Learning using TensorFlow Serving. Applied supervised machine learning models with TensorFlow and integrated LIME for model interpretability to discern feature impact.	
Front-End Developer Tata Consultancy Services Zapopan, MX	Jan 2023 – Nov 2023
Built innovative components to be used in Home Depot’s e-commerce. Engineered modern user interfaces with React components by using Ant Design System, React Testing Library, Jira and Google Cloud Platform. Efficiently deployed, integrated and maintained software engineered by team, and updated GitHub Actions to improve continuous integration practices.	
Junior Back-End Developer NextLine Zapopan, MX	Oct 2022 – Dec 2022
Management system for money lending to people registered at IMSS. Developed Back-End authentication endpoints. Created test plans to assure software quality according to stakeholder requirements and ISO/IEC/IEEE 29119 standard. Used AWS tools to deploy the app that supports the current use of at least 200,000 employees in Mexico.	

RELEVANT PROJECTS

Stream Stage Prediction with ML University of Nebraska–Lincoln TensorFlow, Pandas, NumPy	Aug 2022 – Dec 2022
Trained different Machine and Deep Learning models for predicting stream stage and discharge from the North Platte River. State Line Weir using daylight images taken at one hour intervals from 2012 to 2019. Loss metrics were considered, selected and used to evaluate different models trained with the 40,000+ river images and features extracted in Python (EfficientNetBO, ResNet101, MLP, SVR and RFR).	
Peripheral Loans IBM React, NodeJS, IBM DB2, IBM Cloud Foundry, Postman, Cypress	Jan 2022 – Jun 2022
Engineered a management system that enabled device lending for IBM Guadalajara during Covid. Worked as a full-stack developer, deploying containerized services supporting over 2,000 device records. Rigorously tested features with unit tests, Postman, and Cypress, ensuring seamless alignment with user requirements. Presented the system to executives, showcasing its capabilities and functionalities.	

SKILLS

SOFT	Problem Solving, Leadership, Teamwork, Empathy, Flexibility.
TECHNICAL	Languages: C++ (5 yrs), Python (5 yrs), JavaScript (4 yrs), HTML/CSS (4 yrs), SQL (4 yrs). Developer Tools: Figma (3 yrs), Git (5 yrs), Postman (4 yrs), Docker (3 yrs), Azure (2 yrs). Frameworks/Libraries: TensorFlow, Pandas, NumPy, Matplotlib, React.js, Express.js.
PERSONAL HOBBIES	Swimming, Club de Algoritmia GDL, WaveSense.
LANGUAGES	Spanish (Native), English (B2).
